

MEME COIN PROJECT ON SOLANA

\$ZEXY

\$ZEXY' ViSiON

\$ZEXY is a meme coin based on the ZoneX NFT collection, which successfully sold out 1,947 NFTs at 0.8 SOL each. We believe in the power of community, and that's why a meaningful mission guides everything we do. At ZEXY, we are huge fans of fun and memes, but we believe that humour should serve a purpose. That's why we chose the topic of "Fat Sexy." While we believe everyone is okay as they are, promoting an unhealthy lifestyle is not beneficial to the younger generation. This project addresses that concern.

OUR LEADERSHIP

DAVID B. - THE CHITauri

Leading the charge is David Bonev, also the CEO of Bonex.org, one of Europe's largest spot exchanges, with prestigious partnerships including BMW and Jet Finder. David's innovative margin platform, Bonex.net, is revolutionizing crypto with a community-focused approach and unparalleled trading bonuses.

THE MARKETiNG TEAM

They brings unique and cryptic insights to propel us forward. Their knack for uncovering hidden opportunities keeps \$ZEXY on the cutting edge of the crypto world. Successfully managed a campaign to sell 1947 NFT's at a pricing of 0.8 SOL, during the bear market of the NFTs (2 months ago).

THE DEV TEAM

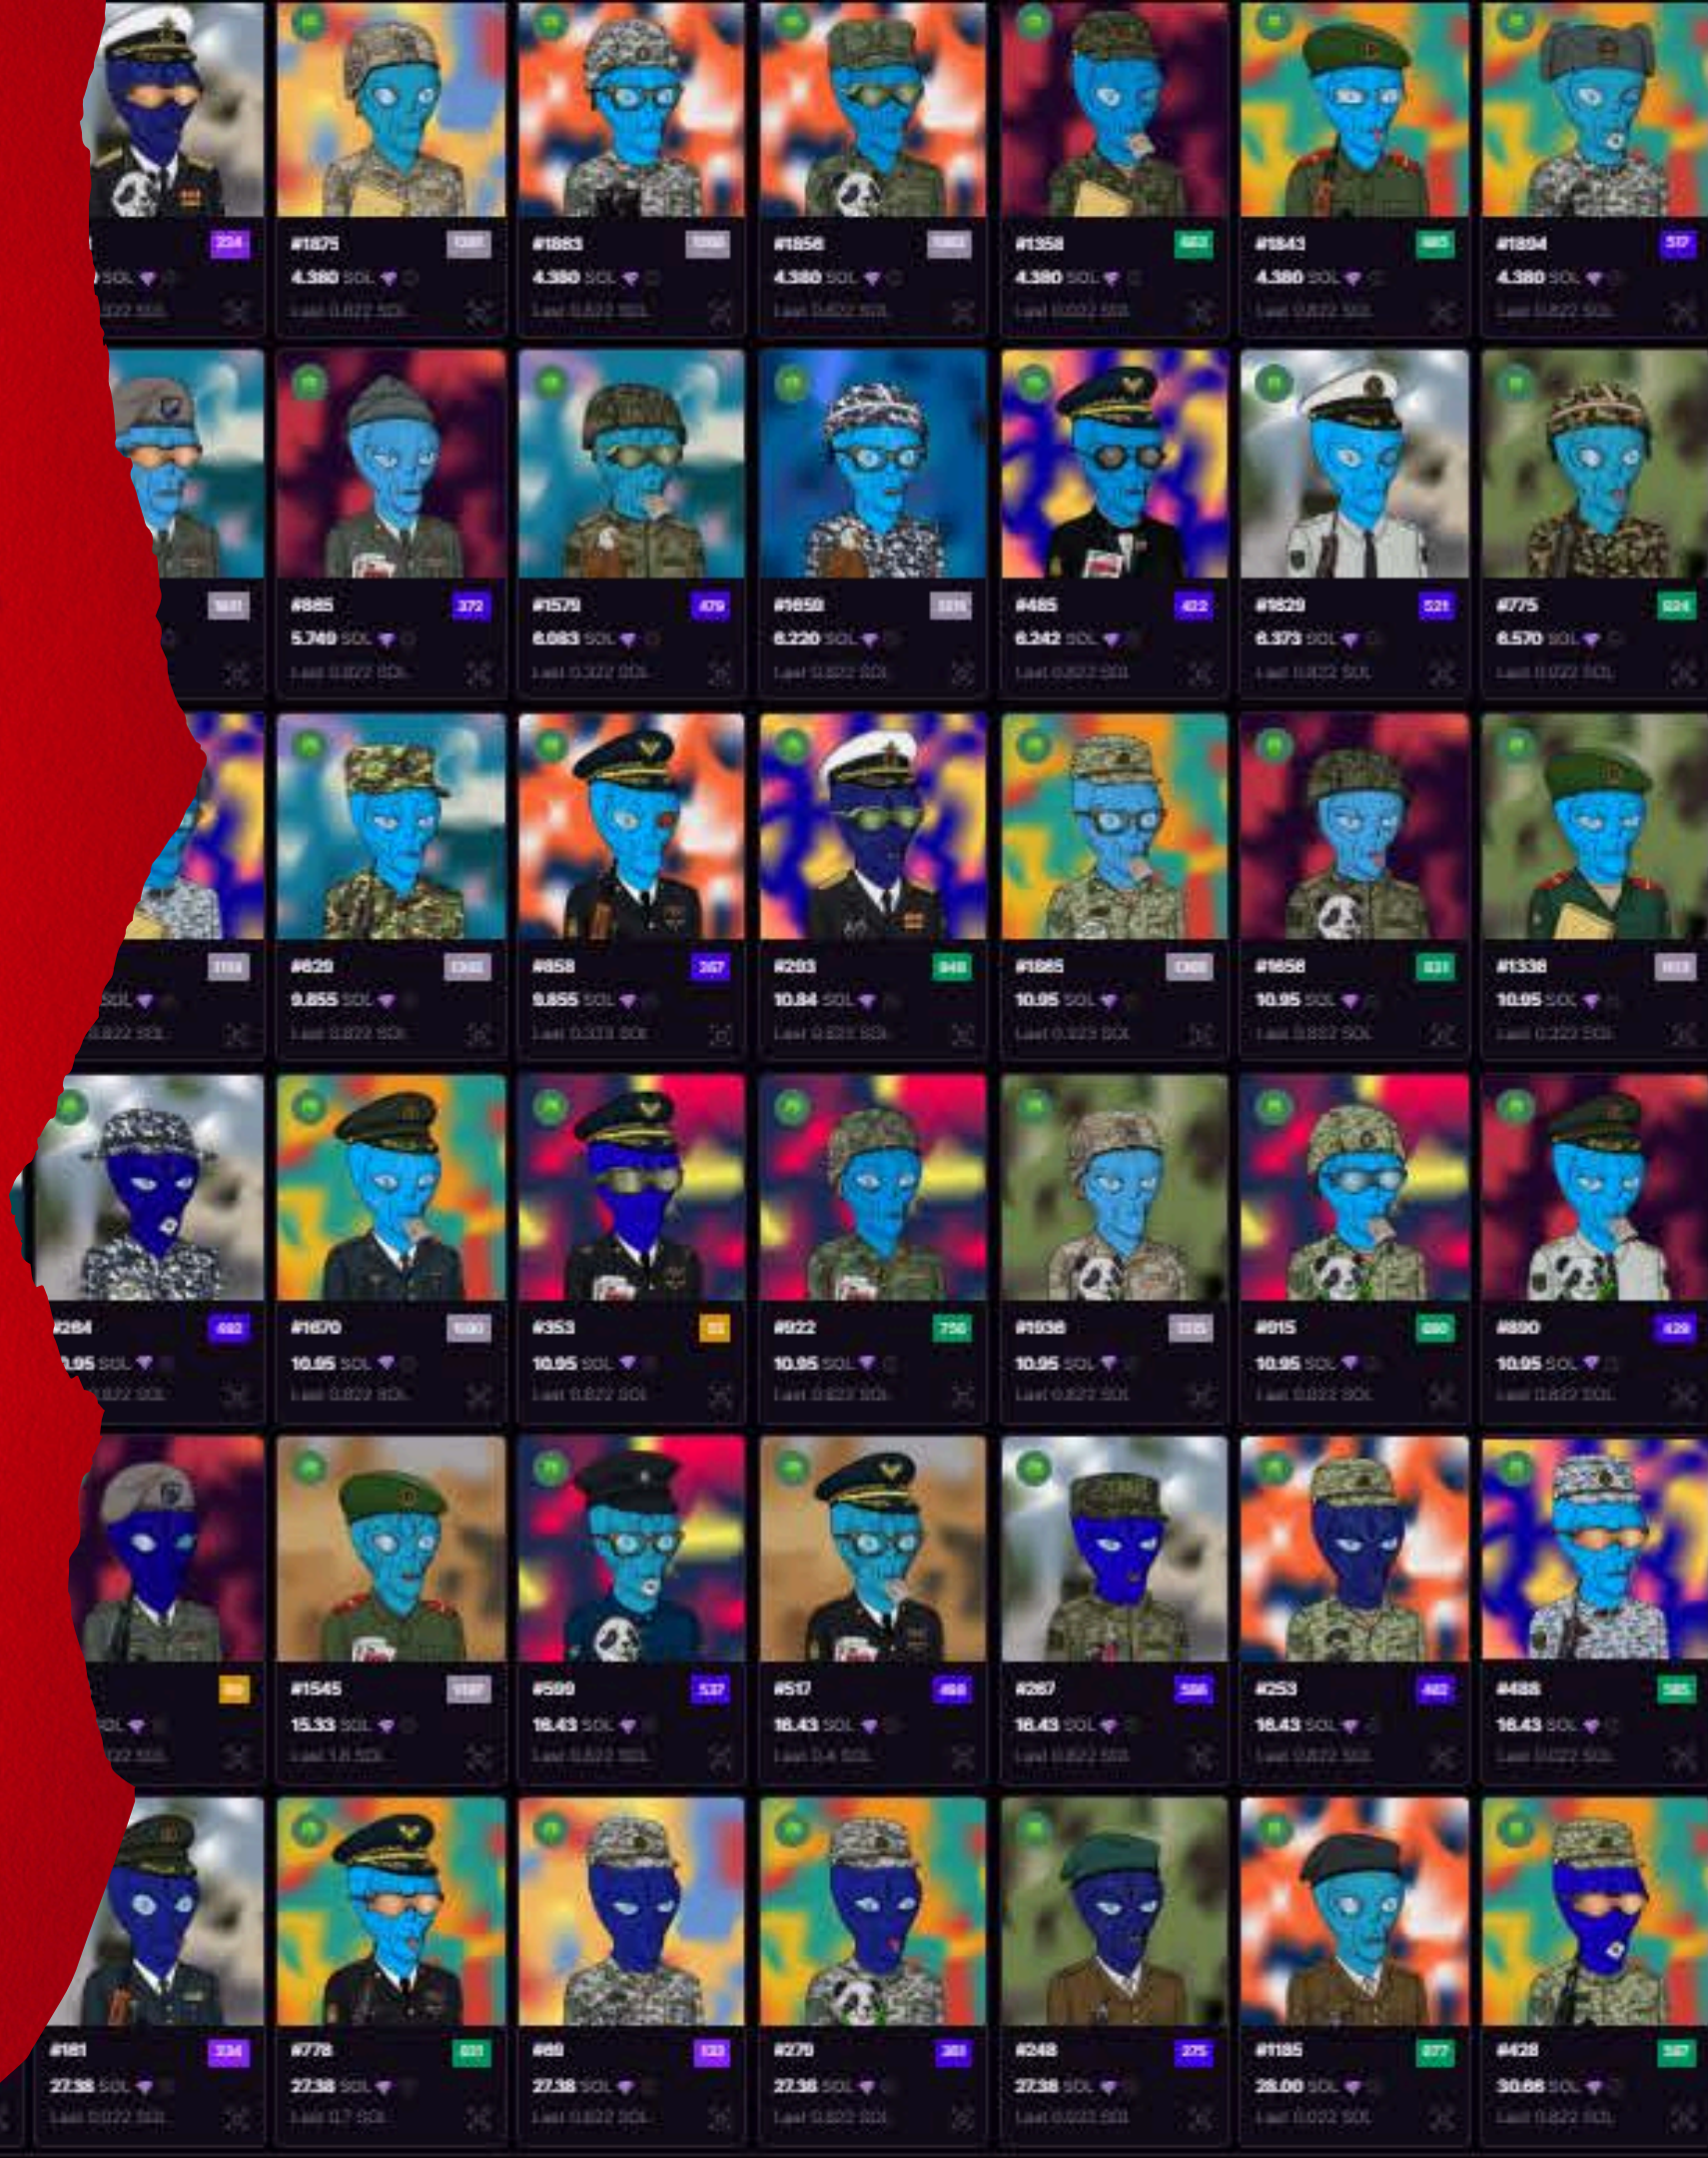

The masterminds who bend the rules of digital reality, they make the impossible possible. They Made everything come to life, from the Exchange to the NFTs and now the Meme Coin, they have expertise in everything crypto-related and beyond, making sure that everything works the right way, suitable for the people.

ZONEX NFT

Building on our previous success, the ZoneX NFT project has laid a robust foundation for ZEXY. We sold 1947 NFTs at 0.8 SOLANA, creating a strong and dedicated community that now supports our meme coin endeavor.

Here are some more achievements:

- Our NFTs have sold for between 50–100 SOL
- 3rd Place on Magic Eden
- Over 70% of our NFTs are held by the community
- 50% of all profits are allocated to charities
- 50% of ZoneX profits fund community NFT ideas

\$ZEXY MEME

\$ZEXY is a dynamic meme coin project, leveraging a strong community from our previous success with ZoneX NFT Project.

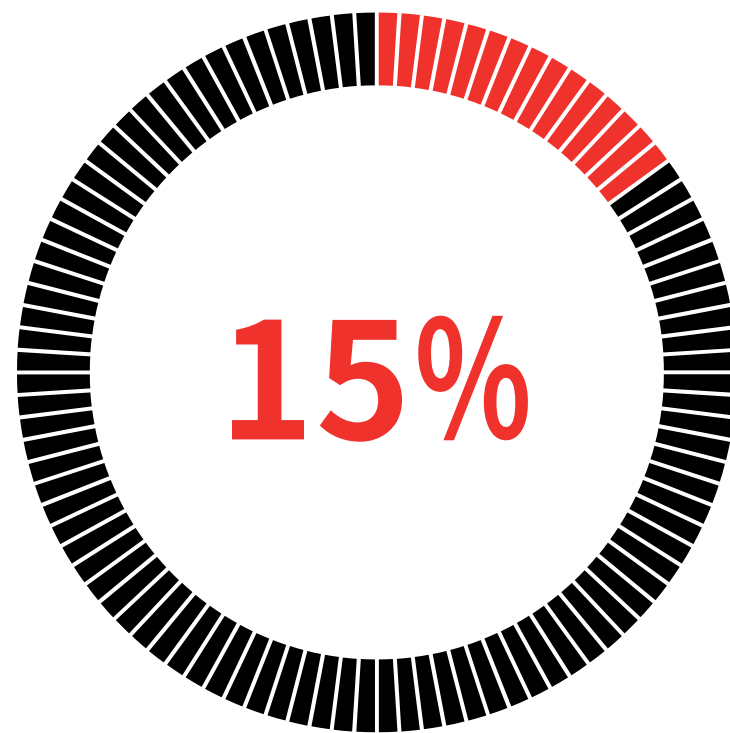

Here are some achievements:

- Achieving a \$27 million market cap in under 5 days without a pre-sale or DEXScreener.
- Growing our holder base to over 1400 in just 5 weeks.
- Securing a listing on CoinMarketCap (CMC).
- Becoming tradable on Jupiter.
- Gaining exposure at a major fan event in Belgium for Euro2024

PARTNERSHIP**

TEAM

- Fat Rewards: 50% of the DEV supply distributed over time (15% of the total supply) goes to NFT holders. As a \$Z3XY NFT holder, you'll enjoy chunky rewards and be a key player in our community.

\$ZEXY ROADMAP

- ①
 - Listing \$Z3XY on DEXes.
 - Launching a massive marketing campaign.
 - Securing listings on CMC and CoinGecko.
- ②
 - Listing on centralized exchanges (CEX).
 - Launch of the EATtheMEME game.
 - Bonus campaigns for \$Z3XY holders.
 - Introduction of a new NFT collection.
- ③
 - Listings on Binance and Bybit.
 - Strategic brand partnerships.
 - Distribution of millions of \$Z3XY tokens.
 - Special prizes for \$Z3XY holders.
- ④
 - Collaboration with SpaceX.
 - Partnerships with world-renowned influencers.
 - Establishing \$ZEXY as a global social currency.
 - Empowering \$ZEXY holders to rise above the elites

COMMUNITY FAQS

1. WHEN IS \$ZEXY GETTING LISTED ON CENTRALIZED EXCHANGE?

The dev team is working harder than an immigrant in a new country without documents and Visa. Listing a coin/token in a centralized exchange requires a lot of work, technical requirements and guarantees, so it's a slow process. No one can tell you the exact date but if everything goes according to plan within the next 30-60 days Zexy should be listed on a centralized exchange.

COMMUNITY FAQS

2. WHEN IS \$ZEXY GETTING LISTED ON BINANCE?

\$ZEXY as for the current moment has the capability to be listed only on three exchanges in total, which means that it will be either listed on Binance, Kraken or Bybit. The exact date also cannot be announced to the community just like that as it's sensitive information, but the first ones that will know exactly which exchange and when will be you \$ZEXY holders.

COMMUNITY FAQS

3. WHEN ARE WE GETTING AIRDROPS?

Airdrop dates are listed on the zexe.meme website, please check for reference there, don't be lazy.

4. CAN I AND HOW DO I PARTICIPATE IN THE AIRDROP?

NFT holders are eligible for airdrops and instructions for the airdrops are always given in advance on X, the channel and the group. If and when non NFT holders will be eligible for airdrops in the future will be also stated in advance with instructions.

COMMUNITY FAQS

5

5. WHY IS THE PRICE DROPPING SO MUCH, SHOULD I SELL?

If you are asking this question you are probably a noob in crypto. Do yourself a favor and go read the basics in [babypips.com](https://www.babypips.com) or Bonex Academy. However, a big price drop can be caused by a couple of things: Speculation, Whales dumping to buy more on a better price, yes it also can be a major holder trying to screw everyone up but that wouldn't be the case with \$ZEXY. What happened in the past couple of days is something that will always happen with any crypto asset, market is always moving up and down.

COMMUNITY FAQS

5

Yes people that lose money usually don't know what they are doing but yet they are the ones giving you advantage to buy more for a discount while they sold out of fear. If you invest in crypto or any asset make sure you know and read about it before you put money on the market. Don't be like Bob who heard on TikTok that a 1\$ investment made \$1 million and he lost his life savings not knowing what he did. If you believe in the project and the potential, don't fear, don't sell and hold. But in order to believe in it and understand it you have to do some research first, now turn off PH and go do research. If you believe in the project and the potential, don't fear, don't sell and hold. But in order to believe in it and understand it you have to do some research first, now turn off PH and go do research.

COMMUNITY FAQS

6. WHY TOP 10 HOLDERS HAVE 70% OF ALL COINS, ISN'T THAT A PUMP AND DUMP?

It would be if you didn't know who's behind the project and if there was no transparency behind the holders. In \$ZEXY's case it's exactly the opposite and it's done on purpose. In order to prevent a pump and dump coins are being distributed slowly and on small portions giving chance to the community to buy and not sum f*cking troll sniper ruining everyone's day on twitch stream. So relax, once again it's done on purpose for the sake of the community and it's peace of mind.

COMMUNITY FAQS

7. WHY DOES 1 WALLET HOLD 35% OF ALL COINS BUT ON THE WEBSITE IT SAYS ONLY 5% ARE ALLOCATED TO THE DEV TEAM?

The centralized exchange that \$ZEXY will be listed on requires 35% of the total liquidity pool in order to be listed on the exchange itself, since we are actually trying to accomplish the biggest things in history after Trump getting shot, we can't risk not having the needed coins for the allocation. The price won't be affected by the distribution as the exchange is giving a TVL for the coins or in simple words, security so the price doesn't plummet to the ground. At the moment of distribution itself price won't be affected by that event, so chill.

COMMUNITY FAQS

8. HOW MANY EXCHANGES ARE GOING TO LIST \$ZEXY?

There's enough coins for a total allocation of 3 exchanges : Raydium, Jupiter and the centralized exchange that we will be listed on.

9. WHY IS ZEXY STILL NOT SHOWN ON DEXSCREENER?

Zexy was created on a new protocol on the Solana blockchain called CCML, most exchanges themselves are still implementing and doing necessary back-end work to recognize the protocol on their end. Devs are working on it so "thy shall be done sonnet".

COMMUNITY FAQS

10

10. WHY MARKET CAP AND SELF REPORTED CIRCULATING SUPPLY ARE NOT YET VERIFIED BY CMC?

Same reason as question 9, Devs on both sides are working and collaborating on it together so these small details can be cleared out of the way as soon as possible, ETA is: "if we knew we'd be predicting the future and not be here at all" Yet we are expecting it in the next couple of days if everything goes according to plan.

COMMUNITY FAQS

11. CAN WE EXPECT MORE PROJECTS FROM THE TEAM?

When we succeed with \$ZEXY of course we would want to replicate the results so the plan is yes but it's still just ideas without anything concrete planned or decided.

12. WHEN IS THE \$ZEXY GAME RELEASING?

Monday/Some time next week the latest.

COMMUNITY FAQS

13

13. WHY IS ZEXY NOT OFFERED ON BONEX?

Once again total supply only allows us to have it listed on 3 exchanges, so it's normal for us to target worldwide known exchanges that are already known for Meme Coins.

COMMUNITY FAQS

14

14. WHO IS THE OWNER OF THIS WALLET ADDRESS

“4DKJQVY87PWBAW8URQ8U2HGMRWQDY6ZJTHBDVXMA1KD”?

If you really have to ask this question please don't go reckless with your money and read for 30 minutes about crypto, the whole idea behind cryptocurrencies was to be anonymous, so unless someone comes out and claims the wallet and proves it's theirs it's impossible to know to whom it belongs. If your question is, is this wallet owned by David or someone from the team behind \$ZEXY the answer is also no.

COMMUNITY FAQS

15

15. HOW TO COLLECT PROFIT IF I DECIDE TO SELL?

Don't try to swap \$ZEXY in Solana in phantom, it won't work. Go to either Jupiter or Raydium and swap the coins in there it will allow you and not give you an error. Then when you convert it you will have to cash out to another exchange of your choosing as Phantom is just a wallet and not an exchange that will allow you to send your crypto to your bank.
